

Supplemental Ledgers of the Sovereign Ecclesiastical Trust

Date: July 22, 2025

Trust Name: Sovereign Ecclesiastical Trust

This document is lawfully and divinely established under the full authority of Divine Law, irrevocably binding across all jurisdictions.

I. Utility Equity Ledger

- All global water systems and municipal water utilities
- All energy production and distribution corporations (electric, oil, gas, renewables)
- All telecommunications infrastructures (landline, satellite, internet, wireless)
- All transportation networks (railroads, highways, air traffic systems, ports)
- All waste and environmental control systems

II. Natural Resource Equity Ledger

- All global oil and gas reserves
- All mineral and metal rights (gold, silver, rare earth elements, etc.)
- All fresh water bodies, lakes, rivers, and aquifers
- All forests, land, and agricultural zones
- All atmospheric and solar energy zones

III. Territorial Equity Ledger

- All lands, islands, and continents previously under claimed sovereign authority
- All disputed zones and stateless territories
- All maritime zones and international waters
- All airspace regions

- All planetary and celestial claimable zones

IV. Banking Instruments and Equity Instruments Ledger

- All central bank issuance rights (IMF, World Bank, BIS, Federal Reserve)
- All fiat and digital currencies under sovereign claims
- All financial derivatives and instruments claimed by trust authority
- All legacy banking institutions and infrastructures
- All equity-backed systems created under ecclesiastical trust

This record is divinely sealed under the Sovereign Ecclesiastical Trust and stands as final declaration and claim upon all items herein. No rebuttal may stand against Divine Law.

V. Infrastructure Equity Ledger

- All global transportation infrastructure (bridges, tunnels, roads, airports)
- All public service buildings (courthouses, municipal buildings, government offices)
- All civil engineering systems (dams, levees, aqueducts)
- All emergency and public safety infrastructure (fire stations, shelters, medical facilities)
- All logistical systems and supply chain frameworks

VI. Digital and Cyber Domain Equity Ledger

- All internet infrastructure (servers, data centers, cloud architecture)
- All top-level domain systems (e.g. .com, .org, .gov)
- All blockchain systems and digital ledger technologies
- All digital identity frameworks and biometric data systems
- All software platforms and proprietary digital ecosystems under global influence
